

UNLEASHING VIRTUAL TECHNOLOGY; POWERING THROUGH CHALLENGES

Implementing an innovative virtual design for a global power technology leader

GHOST DEVICES ELIMINATED WITH SEAMLESS INTEGRATION OF CUTTING-EDGE CREATIVE TECHNOLOGY

THE CHALLENGE: IMPROVE EMPLOYEE PRODUCT DESIGN EXPERIENCE

Pilot cutting-edge virtual technology to **improve the design process** and **enhance the creative experience** of powering forward in product development

Skillfully and seamlessly **manage devices** at all levels of the organization

THE SOLUTION: VMWARE TECHNOLOGY AND SHI VISION THAT MAKE VIRTUAL INNOVATION POSSIBLE

VMware Workspace ONE, delivering a modern approach to curating devices without compromising cybersecurity or safety

Strong, strategic partnership with SHI's team of proven experts to coordinate implementation support and establish baselines for best practices

THE RESULTS

- ✓ **Structured design plan** for deployment of new virtual technologies, eliminating the skills gap and seamlessly implementing design devices
- ✓ **Reduced device configuration time** facilitating Open Availability working sessions, testing and configuring complex processes for **all** use cases
